  - **Team Collaboration:** Coordinated with testing teams and business analysts to ensure requirements were met and quality was maintained throughout the development cycle.
  - **Software Maintenance:** Troubleshooted, debugged, and upgraded existing software to enhance performance and functionality.
  - **Code Implementation:** Transformed designs into clean, efficient code while adhering to best practices and established naming conventions.
- STARDUST Telecom Ltd** AUG, 2021 - AUG, 2023  
Software Developer
  - **Core Development:** Led the development of applications, handling both backend and frontend functionalities.
  - **API Development:** Developed APIs for platforms like MiME TV (IP TV), OTT Apps, and Video Conference Apps.
  - **System Development:** Designed, developed, and maintained systems including **HRIS, Multi-vendor E-commerce, the Towkai OTT Platform, and MiME Meet (Video Conference Web Apps)**.
  - **Issue Resolution:** Analyzed, resolved, and debugged complex bugs and issues to ensure system stability.
  - **Software Maintenance:** Troubleshooted, debugged, and upgraded existing software for improved performance and scalability.
- MicroMac Techno Valley Ltd** Nov, 2019 - AUG, 2021  
Junior Programmer
  - **Application Implementation and Support:** Provided comprehensive implementation and ongoing support for critical business applications.
  - **Software Architecture Design:** Designed and developed robust software architecture for various applications, ensuring scalability and performance.

## AWARD

---

- Employee of the Quarter
- April,2022- Jun,2022

## PORTFOLIO

---

### Confidence Group Human Resource Information System (CGHRIS)

- **Description:** CGHRIS is an all-in-one HR management software that enables companies to efficiently handle both basic and complex HR processes, including employee management, compensation and benefits, settlement, OD training, leave attendance, e-recruitment, and self-service management.
- **Client:** Confidence Group
- **Technology Stack:** Laravel, Vue.js, MySQL
- **Contribution:** Actively contributed as a team member, focusing on the development and support of key HR functionalities.

### eDoc (Security Document Management System)

- **Description:** eDoc is a comprehensive banking security document management system that enables efficient location and retrieval of loan documents.
- **Clients:** City Bank Ltd., Prime Bank Ltd., Eastern Bank, Padma Bank, One Bank, Community Bank.
- **Technology Stack:** CodeIgniter, MySQL
- **Contribution:** Collaborated as a key team member, contributing to the development and maintenance of the system.

### Learning Management System

- **Description:** The first and only platform in Bangladesh that provides comprehensive legal and compliance knowledge for new law graduates, local businesses, and legal professionals. It aims to improve the quality of legal services and expertise available to the citizens of a smart Bangladesh, ensuring access to justice.
- **Client:** Legalized Education Bangladesh Ltd.
- **Technology Stack:** Laravel, React.js, Video Cipher, MySQL
- **Contribution:** Led the development as the team lead, overseeing both backend and frontend architecture and ensuring smooth integration of video streaming functionalities.

### Campaign Management System

- **Description:** A system for managing and tracking promotional campaigns where gifts are distributed to participants. The platform handles eligibility rules, gift assignments based on user actions or statuses, and monitors distribution to ensure participants receive their rewards accurately.
- **Clients:** Japan Solar, Transcom Electronics, Nippon Paints
- **Technology Stack:** Laravel, MySQL
- **Contribution:** Led the project as the team lead, overseeing the design, development, and successful deployment of the system.
